

# SUMMER SCHOOL

# "Biomarkers for lakes ecological monitoring"

## Thonon les Bains 26-30 June 2023

One week training for students MSc or Doctoral degree.

To strengthen knowledge in lakes ecological monitoring with a strong focus on biomarkers and high frequency methods. The program will be based mainly on field samplings and practical workshops to present and apply current approaches and cutting-edge techniques (genetics, isotopy, acoustics, paleolimnology, etc.) to assess the functioning of lake ecosystems subject to several anthropogenic pressures.

Info and registration: please send your CV before 15.05.2023 to [serena.rasconi@inrae.fr](mailto:serena.rasconi@inrae.fr)

The training and a shared accommodation in Thonon les Bains (25-30 June) are offered by funding from INRAE- Department AQUA and the CARTEL personnel.
